

Gentlemen, I wanted to comment on the above pending bill. I have been notified that you have taken under consideration a bill that would do away with Indiana's home phone privacy law. I would like to attest to the effectiveness of this bill. Before it went into effect there were certain days that I would receive as amny as 20 or more unsolicited phone calls a day and these were to say the least very very annoying. I have since added my name to the established list here in Indiana and since it's inception I no longer receive any calls. It is my wish that you leave the bill implemented here in my state in place as I feel it works very well indeed. I as a citizen have no desire to be bothered at my home by telemarketers. Should I wish to acquire any thing they perhaps would be selling I would seek their product out at the time I have a desire for it. Thank you for your time, Sincerely Michael S. Fields
